# REAVERS OF MIDGARD

2-4 Players • 60-120 Minutes

## GAME DESCRIPTION

In **Reavers of Midgard**, you are the master of your own longship with a small but loyal crew by your side. You set out to gain glory and become the most renowned reaver in all of Midgard. Recruit vikings to man your longship. Cast bones in order to glimpse your destiny. Slay giant sea monsters and battle against the draugr. Pillage castles and small villages, and force territories to pay tribute to you lest you decide to conquer their lands. In the end, will skalds tell the tale of your adventures? Or will your rivals surpass you and have their stories spun in the Halls of Valhalla?

## OBJECTIVE

The goal of the game is to have the most **Glory** at the end of 6 rounds.

Players gain **Glory** by discovering powerful artifacts, raiding keeps and villages, fulfilling prophecies, conquering territories, and winning battles at sea.

# COMPONENTS

1 Game Board

4 Score Trackers  
(1 of each color)

8 Longship Pawns  
(2 of each color)

62 Village Spoils Cards

76 Keep Spoils Cards

1 Start Player Marker

1 Honor Ship Token

24 Sea Journey Cards

45 Sea Battle Cards

34 Prophecy Cards

66 Reaver Cards

20 Small Favor Tokens  
5 Large Favor Tokens\*

\* Worth 5 Favor each

30 Small Food Tokens  
10 Large Food Tokens\*

\* Worth 5 Food each

14 Terror Tokens\*

\* Favor, Food, and Terror tokens are not limited. If you run out, use a suitable stand-in.

4 Player Boards

15 Farm Tokens

15 Wall Tokens

15 Tower Tokens

1 Round Tracker

60 Crew Dice

(20 of each color)

6 Combat Dice

54 Conquered Territory Tiles

12 Ship Upgrade Tiles

2 Reference Cards

## GAME SETUP

- 1 Set the **Game Board** in the middle of the playing area, and place the **Round Tracker** on the space labeled 1. (The displayed board is for 3-4 players. Use the reverse side for a 2-player game.)
- 2 Give the **Start Player marker** to whomever most recently won glory in battle. (Alternatively, select a start player at random.) In a three-player game, also give the first player the Honor Ship token. **The Honor Ship token functions as an extra Longship pawn for the player controlling it.**

- 3 Give each player:

1 Favor token

1 Longship pawn and 1 score tracker  
(In a two-player game, give each player 2 Longship pawns)

1 Player Board

- 4 In clockwise order, the Start Player takes **4 Food tokens**, the second player takes 5 Food, the third player takes 6 Food, and the fourth player takes 7 Food.
- 5 Each player places their score tracker at the 0 marker on the Glory track.
- 6 Separate the **Sea Journey, Sea Battle, Village Spoils, Keep Spoils, Reaver, and Prophecy cards**. Shuffle each deck separately then place them on their corresponding spaces on the Game Board.
- 7 Each player takes 2 Reaver cards from the deck. Players roll the dice indicated on the top left of each of these Reaver cards and place them on their Player Board. Then each player decides whether to **Rally, Specialize, or Promote** them according to the **Recruit Reavers** rules on page 7. (Read that section fully before beginning your first game.)
- 8 At each **Action Location**, fill the spaces with cards according to the number of players (see page 5).
- 9 Sort the **Territory tiles** by type and shuffle them. Then, place them on their corresponding spaces.
- 10 Roll 2 of each color **Crew dice**, and place them in their corresponding spaces within the **Trade with Villages** Action Location.
- 11 Place the **Ship Upgrade tokens** at the **Raid Villages** Action Location on their corresponding spaces.
- 12 Place the **Dice, Food, Favor, Terror, Wall, Farm, and Tower tokens** in a supply accessible to all players.

## GAME SETUP (KONT.)

During initial Game Setup, and during each cleanup phase, set up each of the Action Locations as described below:

**Trading with Villages:** Place a Prophecy card face up in each of the card spaces. Then, roll and place two of each color Crew dice in the designated dice spaces.

**Sea Battle:** Place Sea Battle cards face up in each of the card spaces according to the number of players.

**Raid Villages:** Place Village Spoils cards face up in each of the card spaces according to the number of players.

**Raid Keeps:** Place Keep Spoils cards face up in each of the card spaces according to the number of players.

**Recruit Reavers:** Place Reaver cards face up in each of the card spaces according to the number of players. Each space is designed to hold one card vertically and one card horizontally so that all of the relevant information is visible.

## PLAYING THE GAME

**Reavers of Midgard** is played over six rounds during which you sail your longship to various locations throughout the land. You will lead your viking warriors as you lay siege to powerful castles and raid unsuspecting villages. The seas are full of danger. You will encounter other raiders, draugr, and maybe even a spawn of Jormungandr. Your crew will grow stronger as you outfit your ship with upgrades and powerful artifacts. Though the players will take turns choosing locations to raid, each will partake in the spoils.

Once the 6th round has ended, players will total their score in **Glory**. The player with the most **Glory** wins!

### PLAYING A ROUND

Whoever has the Start Player marker places their Longship pawn on an Action Location. Then, each player immediately activates the effects on any Reaver cards they have specialized in that action (see **Recruit Reavers** on page 7).

After activating the effects of Reavers, each player may activate the effect of the Action Location selected. The player who selected the Action Location gets a powerful bonus. The other players get lesser bonuses. Most Action Locations have a cost to activate. Any player taking the action must pay the cost. Instead of paying the cost and taking the action a player may opt to **Rest**. After each player has resolved the effect of a selected Action Location, the next player clockwise places their Longship pawn on a different Action Location, repeating this process. The round ends once four Action Locations have been activated. (This means that in a 2-player game, each player will place two Longship pawns, alternately choosing Action Locations. In a 3-player game, each player will place a Longship pawn, one at a time, in clockwise order. Then, the player with the Honor Ship pawn places it to select an additional Action Location.) At the end of a round, players refresh all the Action Locations by discarding any remaining cards and refilling the empty spaces as shown on page 5.

**Note:** Players should place discarded cards face up on the bottom of their respective decks. If a deck runs out, the discarded cards should be shuffled to create a new deck. **Note:** Each Action Location may only be selected once per Round.

1. A player places their Longship pawn on an Action Location.

2. Each player activates the effects of Reaver cards in the corresponding Specialize slot from top to bottom (see **Recruit Reavers** on page 7).

3. Beginning with the active player and continuing clockwise, each player must pay associated costs if they wish to execute the action. Alternatively, they may Rest (see **Rest** on page 7).

Players should activate their Reaver cards simultaneously. If any timing conflicts arise, resolve them in player order, beginning with the active player.

**Note:** The abilities of specialized Reaver cards are activated before a player decides whether to activate the Action Location or Rest.

### ACTION SELECTION

There are two different kinds of Action Locations, indicated by the color of their banner. **RED** locations provide an effect **and** also an additional bonus depending on player order. **BLUE** locations provide an effect that may be **repeated** a certain number of times depending on player order.

In either case, the cost for the location is indicated in the **BLACK** section on the left side of the Action Location graphic. Players must discard the indicated resources to the general supply if they wish to activate the Action Location. (Alternatively, they may Rest.)

The effects of each Action Location are described in detail below.

**Note:** The bonuses that players receive are based on their proximity to the active player, **not** on the order of activation. Meaning if the player 1 seat clockwise from the active player chooses to not to pay the cost and participate in the effect of the Action Location, the next player to pay the cost **does not** get the second player bonus.

Additionally, the bonuses described below apply to the 3- and 4-player game. In a 2-player game, the second player receives the same bonus the fourth player would receive in a larger game. This is indicated graphically on the 2-player side of the game board.

## IMPORTANT TERMS

**Rest:** Whenever a player cannot (or chooses not to) pay the cost to activate an Action Location, they must Rest. When a player Rests, they may take either 2 Food from the supply or 1 Crew die from the supply in a color of their choice and place it on their Player Board on a side of their choice.

**Active Player:** The player who is selecting an Action location. The “second,” “third,” and “fourth” players in Action Location descriptions are counted clockwise from the active player.

**Glory Pile:** Sometimes you will be instructed to discard a card to your Glory pile. This is a personal discard pile that will be relevant for end-game scoring. When you discard cards to your Glory pile, simply keep them face-down near your Player Board.

Cards discarded from your Player Board go to your Glory pile. Any other cards discarded should be placed face up on the bottom of their respective decks unless noted otherwise.

## RECRUIT REAVERS

For each Reaver card you take, also take the dice depicted in the top left corner of the card from the supply. Roll these dice and place them in free dice spaces on your player board. If you do not have space for any more dice, you may discard excess dice from your Player Board or discard some or all of the newly-rolled dice.

After collecting your dice, you must decide to use each Reaver card in one of the following three ways.

**Rally** – Take the dice depicted in the top right corner of the card and place them on your Player Board on a face of your choice. (Then, discard the Reaver to your Glory pile.)

**Specialize** – Slide the Reaver card underneath one of the four **Specialize slots** on your Player Board until only the ability is visible. These abilities activate when any player selects the corresponding action space. **You may Specialize a maximum of three Reavers in each action space.** If all of your action spaces are full, subsequent Reaver cards you acquire must be Rallied or Promoted.

**This Action Location has no cost.**

All activating players gain 2 Reaver cards. Beginning with the active player and proceeding clockwise, each participant chooses a face-up stack of cards from the board **or** 2 random cards from the Reavers deck. The player who selects this locations gain 2 Favor. The other players receive no bonus.

DICE RALLY

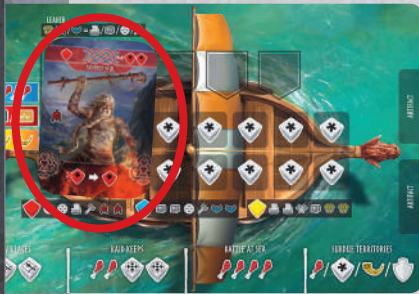

CLAN  
KON

SPECIALIZATION  
ABILITY

**Promote** – Place the Reaver card in the Leader space on your Player Board, and immediately take the bonus corresponding to their Clan - indicated by color and aligned with the Reaver's Clan icon on the left edge of the card. If you already have a Reaver card in your Leader space when you Promote a new Reaver, discard the previous Reaver to your Glory pile.

- Promoting a Reaver provides you with 4 Food.
- Promoting a Reaver lets you draw either one Keep Spoils or one Village Spoils card.
- Promoting a Reaver provides you with 2 Favor.

In addition to providing an immediate bonus, Promoting a Reaver to Leader allows you to use any dice showing your Leader's Clan icon as a Shield, Chest, Ship, or Single Hammer icon (indicated on your Player Board for reference).

## TRADE WITH VILLAGES

**This Action Location has no cost.**

The active player takes the Start Player marker. Beginning with the active player and proceeding clockwise, each participant from the available rewards a declining number of times.

The active player chooses 3 rewards. The second player chooses 2 rewards. The third and fourth players choose 1 reward.

The available rewards are as follows:

- 2 Favor
- 3 Food
- Any two dice **available in dice slots at this Action Location**. These dice are not rolled and are kept on the same face as when selected. (If all of the dice from this Location have been taken, you may not choose this reward.)
- A face-up Prophecy card (or a random Prophecy card from the deck)

**Note:** You may choose the same reward multiple times.

**Note:** If the player with the Start Player marker selects this Action Location, they **must** pass the Start Player marker to the next player clockwise.

## BATTLE AT SEA

**This Action Location costs 4 Food to activate.**

All activating players attempt to win a Sea Battle. Beginning with the active player and proceeding clockwise, each participant reveals and resolves a Sea Journey card and then chooses a Sea Battle card to encounter (either one of the face-up cards or a random card from the top of the deck). The active player gains 2 Glory upon selecting this location. Other players receive no bonus.

**Journey** – Reveal the top card of the Sea Journey deck. Most of these cards give players the choice of paying the cost depicted in the top right corner or suffering the effect in the text box at the bottom. Some of the cards have no effect.

**Battle** – Sea Battle cards may be resolved in two different ways. Sea Battle cards show a Defense value (in the Shield) and a combination of dice shown at the top of the card. To defeat the Sea Battle, you may discard the specified combination of Crew dice from your Player Board **or** you may attempt to defeat the Sea Battle in **combat** (see below).

If you win the Sea Battle using either of the above methods, gain the rewards depicted at the bottom of the card then add it to your Glory Pile.

**COMBAT:** To participate in combat, discard any number of Crew dice showing a single or double Hammer face. For each Hammer discarded, roll a Combat die. Combat dice will show 0-2 successes (depicted as ). Roll at least as many successes as the number shown in the target card's Defense value to defeat the enemy.

After any combat roll, you may spend 1 Favor to reroll any number of Combat dice. You may continue discarding Favor to repeat this effect as many times as you wish.

## RAID VILLAGES

**This Action Location costs 1 Food and 2 dice on their Treasure Chest face to activate.**

All Activating players gain 2 Village Spoils cards. Beginning with the active player and proceeding clockwise, each participant chooses a face-up linked group of cards from the board **or** 2 random cards from the Village Spoils deck.

The player who selects this location gains 2 additional random cards from the Village Spoils deck. The second player gains 1 additional random card from the deck. The third and fourth players receive no bonus.

**Any time you take multiple cards in *Reavers of Midgard*, you resolve them one at a time and in any order that you choose.** The Village Spoils deck has several different types of cards.

**Artifacts** – Artifact cards are placed face up in one of the four indicated spaces on your player board. If all four spaces are already filled, you may discard either an already-owned Artifact or a newly-acquired one to your Glory pile. Artifacts provide a space for storing additional dice and have effects that can be activated by discarding the die stored on them. You may only store the die indicated and may not store a die showing a Clan icon as a wild. Artifacts may be activated during the activation of specific Action Locations as indicated on the card. See the Glossary (on pages 17-18) for details.

**Note:** Artifacts may be used when an Action Location is selected, even if the artifact's owner chooses to rest. Furthermore, each Artifact can only be used once per Action Location activation.

**Ship Upgrades** – Ship Upgrade cards give you a choice of taking the depicted Ship Upgrade token and placing it on a free Ship Upgrade space on your Player Board **or** taking 3 Glory immediately. After either choice, the card is discarded. Ship Upgrade tokens show an icon that normally appears on Crew dice and may be activated once per turn as though you were spending a Crew die with that icon. When activating a Ship Upgrade, turn the token face-down on your player board. All face down Ship Upgrade tokens are flipped face up during the cleanup phase.

**The token that depicts a Ship and a Hammer may be used as either, but not both.**

**Farm** – Farm cards give you 3 Food immediately. Additionally, you may choose to Pillage the Farm. If you choose to Pillage, gain 1 additional Food, 1 Farm token, and 1 Terror token from the supply. After choosing whether or not to Pillage, discard the Farm card.

**Pillage:** Pillaging is an optional action that you may take for an additional effect. When cards show a icon, you automatically receive the reward to the left of the . You only take the reward to the right of the if you choose to pillage.

**Village Wall** – Village Wall cards give you 2 Favor immediately. Additionally, you may choose to Pillage the Wall. If you choose to Pillage a Village Wall, gain 1 additional Favor, 1 Wall token, and 1 Terror token from the supply. After choosing whether or not to Pillage, discard the Village Wall card.

**Note:** Farm, Wall, and Tower tokens grant you Glory at the end of the game. Terror tokens cost you Glory at the end of the game. See *End Game Scoring* (page 13).

**Bundle of Swords / Bows and Arrows / Axes and Spears** – These cards represent craftspeople in the village and offer players an immediate choice. You may either take the 2 dice depicted on the left (signifying trading with the craftspeople) **or** take the Glory and Terror token depicted on the right (signifying pillaging their stall). After making your choice, discard this card.

**Runic Carvings** – These cards represent craftspeople in the village and offer players an immediate choice. You may either discard 1 Terror token and force another player to gain 1 (signifying trading for runes that you utilize well) **or** take the Glory and Terror tokens depicted on the right (signifying pillaging their stall). After making your choice, discard this card.

## RAID KEEPS

**This Action Location costs 2 Food and 2 dice on their Shield face to activate.**

All activating players gain 2 Keep Spoils cards. Beginning with the active player and proceeding clockwise, each participant chooses a face up linked group of cards from the board **or** 2 random cards from the deck.

The active player gains 2 additional random cards from the Keep Spoils deck. The second player gains 1 additional random card from the deck. The third and fourth players receive no bonus.

The Keep Spoils deck has several different types of cards:

**Treasure/Art/Armor** – These cards are all scored as sets at the end of the game. The more of a particular type you have, the more **Glory** you will gain. The graphic on the bottom of each card shows you how to score based on the number of that particular card you possess. If you possess more cards than are indicated on the bottom of the card, create more than one set and score each set individually. When you gain one of these cards, add it to your Glory pile.

**Tapestry** – Tapestries are collected in sets that contain one of each type of Tapestry. If you have all 3 different types, you will gain **15 Glory**. Tapestries that are not part of a complete set score **2 Glory** each. When you gain one of these cards, add it to your Glory pile.

**Keep Wall** – Keep Wall cards give you 2 Favor immediately. Optionally, you may also choose to Pillage the Wall. If you choose to Pillage a Keep Wall, you must succeed in a combat against it (see *Combat* page 9). Keep Walls have a Defense Value of 2. If you succeed in the combat, you have successfully Pillaged the Wall and gain 1 additional Favor and 1 Wall token from the supply. After resolving the Keep Wall card, discard it.

**Tower** – Tower cards give you 2 dice immediately. Optionally, you may also choose to Pillage the Tower. If you choose to Pillage a Tower, you must succeed in a combat against it (see *Combat* page 9). Towers have a Defense Value of 3. If you succeed in the combat, you have successfully Pillaged the Tower and gain **3 Glory** and 1 Tower token from the supply. After resolving the Tower card, discard it.

**Note:** Farm, Wall, and Tower tokens grant you Glory at the end of the game. Terror tokens cost you Glory at the end of the game. See *End Game Scoring* (page 13).

## SUBDUE TERRITORIES

**This Action Location has a variable cost to activate.**

Beginning with the active player and proceeding clockwise, each participant may attempt to Subdue territories a declining number of times.

The active player may attempt to Subdue 3 territories.

The second player may attempt to Subdue 2 territories. The third and fourth players may attempt to Subdue 1 territory.

**Subdue by Force** – First, select the territory you wish to Subdue. Then, attempt to defeat the territory in combat (see *Combat* page 9), using the Defense Value indicated on that Territory tile. The higher the Territory's Defense Value, the greater the potential reward for Subduing it (see page 19). If you succeed in combat, claim the territory tile, and place it in your play area. If you fail in combat, do not claim the territory tile. This Failure still counts as one of your allowed attempts at subduing a territory.

**Peacefully Subdue** – First, select the territory you wish to Subdue. Then, discard the resources indicated on the top of that territory tile. The more resources you spend, the greater the potential reward for Subduing the Territory. After spending the required resources, claim the territory tile and place it in your play area.

After completing **all** of your attempts to Subdue territories, flip over all the territory tiles you Subdued this turn and claim the rewards indicated.

Territory tiles are divided by resource type and by level. Red tiles are Food Territories, blue tiles are Favor Territories, and purple tiles are Dice Territories. The level is equal to the Defense value on each tile, either 1, 2, or 3.

**During the Cleanup Phase, players score 1 Glory for each territory tile they have Subdued so far.**

## CLEANUP PHASE

At the end of each round of the game, players complete the following steps to prepare for the next round:

- 1 If you are on Round 6, proceed to final scoring. Otherwise, move the Round marker 1 space clockwise.  
**In a 3-player game, the player with the Honor Ship token passes it clockwise to the next player.**
- 2 Each player gains 1 **Glory** for each territory tile in their play area.
- 3 Clear any dice from the Trade with Villages Location and replace them.
- 4 Discard any remaining face-up cards from the game board and refill from the corresponding decks.

## FINAL SCORING

On the back of the rulebook, you will find a scoring chart that you can copy to make your own scoring easier. (You may also download scoring charts from [www.greyfoxgames.com](http://www.greyfoxgames.com))

At the end of the game, each player should take all of the cards from their Player Board and Glory pile and separate them by type. Score each group of cards in the following manner:

- 1** **Terror tokens** – Lose **Glory** according to how many Terror tokens you have.

	1 Terror token	-1 Glory	Any further Terror tokens cause the players to lose 6 additional Glory each.
	2 Terror tokens	-3 Glory	
	3 Terror tokens	-6 Glory	
	4 Terror tokens	-10 Glory	
	5 Terror tokens	-15 Glory	
	6 Terror tokens	-21 Glory	

- 2** **Artifacts** – Gain the amount of **Glory** listed on each card.

- 3** **Keep Spoils cards** – Sort the cards based on their sets and gain **Glory** according to the size of each set.

- 4** **Farm/Wall/Tower tokens** – Score each token separately according to the following chart. If multiple players tie with the most tokens of a type, all tied players gain the full amount of **Glory**.

	1 - 3 Farm tokens	1 Glory Each	<b>MAJORITY BONUS</b> The player with the most Farm tokens gains 3 additional Glory
	4 - 5 Farm tokens	2 Glory Each	
	6 + Farm tokens	3 Glory Each	
	1 - 3 Wall tokens	2 Glory Each	<b>MAJORITY BONUS</b> The player with the most Wall tokens gains 4 additional Glory
	4 - 5 Wall tokens	3 Glory Each	
	6 + Wall tokens	4 Glory Each	
	1 - 3 Tower tokens	3 Glory Each	<b>MAJORITY BONUS</b> The player with the most Tower tokens gains 5 additional Glory
	4 - 5 Tower tokens	4 Glory Each	
	6 + Tower tokens	5 Glory Each	

- 5** **Prophecies** – Gain **Glory** as indicated by each Prophecy card in your play area. See *Glossary* (pages 16-17).

- 6** The player with the most **Glory** becomes the most respected Reaver in all of Midgard and is the winner of the game. In case of a tie, the player with the most Favor tokens wins. If players are still tied, they share the victory.

1 Art Keep Spoils card grants 3 Glory.

1 Treasure Keep Spoils card grants 2 Glory.

The **Skidbladnir Artifact Village** Spoils card grants 2 Glory.

The **Draupnir Artifact Village** Spoils card is grants 3 Glory.

The **Bodn Artifact Village** Spoils card grants 4 Glory.

The **Dainsleif Artifact Village** Spoils card grants 2 Glory.

The **Valhalla's Champions** Prophecy card grants 1 Glory per Artifact for a total of 4 Glory.

Since this player has 5 Wall tokens, each grants 3 Glory. They player also earns the majority bonus of 4 Glory for a total of 19.

3 Terror tokens cause the player to lose 6 Glory.

The **Lord Slayer** Prophecy card grants 1 Glory per Tapestry card for a total of 0 Glory.

The **Feast of the Gods** Prophecy card grants 1 Glory per Food Territory for a total of 0 Glory.

The **Odin's Warrior** Prophecy card grants 1 Glory per Raven Reaver card for a total of 6 Glory.

The **Juggernaut** Prophecy card grants 1 Glory per Wall token for a total of 5 Glory.

The **Refined Taste** Prophecy card grants 1 Glory per Art card for a total of 1 Glory.

**= 161 GLORY** After all end-game scoring, the orange player has 161 Glory.

Each **Vanquisher Prophecy** card grants 1 Glory per Tower token for a total of 2 Glory per Tower token.

**101 GLORY**  
before final scoring

4 **Art Keep Spoils** cards make 1 complete set, granting 10 Glory, and 1 additional card, granting 3 Glory, for a total of 13 Glory.

A single **Treasure Keep Spoils** card grants 2 Glory.

3 Unique **Tapestry Keep Spoils** cards make one complete set, granting 15 Glory.

The **Bodn Artifact Village Spoils** card grants 4 Glory.

**+11**

Since this player has 4 Farm tokens, each grants 2 Glory. They also earn the majority bonus of 3 Glory for a total of 11.

**+11**

Since this player has 2 Tower tokens, each grants 3 Glory. They also earn the majority bonus of 5 Glory for a total of 11.

**-3**

2 Terror tokens cause the player to lose 3 Glory.

The **Shaman of the World Prophecy** card grants 1 Glory per Prophecy card for a total of 7 Glory.

The **Lord Slayer Prophecy** grants 1 Glory per Tapestry card for a total of 3 Glory.

The **Refined Taste Prophecy** card grants 1 Glory per Art card for a total of 4 Glory.

The **Juggernaut Prophecy** card grants 1 Glory per Wall token for a total of 0 Glory.

The **Berserker's Glory Prophecy** card grants 1 Glory per Helm Reaver card for a total of 8 Glory.

**= 180 GLORY** After all end-game scoring, the teal player has 180 Glory and wins the game!

# GLOSSARY

## REAVERS
